

CONSTRUCTION OF STADIUM AND FACILITIES

BARNET FOOTBALL CLUB, EDGEWARE, LONDON

CHALLENGE

CS2 were appointed to project manage the construction of Barnet Football Club's new stadium facility following their move from Underhill. The project was very challenging, design and construction were completed between January to July, the new West Stand was at the closest point 3.5m from the foot of a structural embankment of London Underground's Jubilee line and the site was a flood plain requiring a large amount of water attenuation. Despite these challenges the project was completed within the timescale and on budget.

SERVICES PROVIDED

- Project Management
- Contract Administration

SERVICES PROVIDED

- Project delivered within a very tight timescale
- Delivered on budget

THE SOLUTION

The works included the new pitch, grandstands, seating, terraces, concourses, barriers, turnstile blocks, floodlights, control rooms, toilets, home and away bars etc. Our role included managing designers, specialist contractors, statutory authorities and stadia safety bodies.

BEFORE

AFTER

What makes the CS2 approach different, is the way we work with our clients and their partners to achieve maximum value. We develop solutions that are both aligned with the client's thinking and integrated throughout the whole life-cycle of the property. Underpinning this approach is our real passion for what we do, the performance we deliver and the long-term partnership we look to build.
