

112 SITES ACROSS VODAFONE'S UK PORTFOLIO

VODAFONE : VARIOUS LOCATIONS NATIONWIDE

CHALLENGE

CS2 were appointed by one of the UK's most well know telecommunication retailers to identify future maintenance budgets and essential repairs on part of their retail portfolio. This involved detailed inspections of 112 sites across the UK, with the subsequent production of planned preventative maintenance schedules on a 5-year basis. The client was able to identify anticipated short and medium term expenditure, enabling them to set future maintenance budgets. CS2's bespoke reporting provided maintenance reports and health and safety issues requiring immediate attention with associated costs. This was a crucial aspect of the reporting process for the client.

SERVICES PROVIDED

Planned Preventative Maintenance

POSITIVE OUTCOMES

- Preparation of a 5 year planned preventative maintenance programme on 112 sites across Vodafone's UK portfolio
- Presentation of practical solutions
- Drawing on experience, resource and office network
